I am seeking refuge in Allah from Shaitan, the outcast (the cursed one). In the Name of Allah, the Most Gracious, the Most Merciful.

"Those who consume interest cannot stand (on the Day of Resurrection) except as one stands who is being beaten by Shaitan into insanity. That is because they say, 'Trade is just like interest' whereas Allah has permitted Trading and has forbidden Interest. So whoever has received an admonition from his Lord and desists may have what is past, and his affair rests with Allah. But whoever returns to (dealing in interest) those are the companions of the Fire; they will abide eternally therein". (Surah 2 Al-Bakara: 275)

"O you who believe! Be afraid of Allah and give up what remains (due to you) from interest, if you are (really) believers. If you do not do it, then take a notice of war from Allah and His Massenger (Rasul)". (Surah 2 Al-Bakara: 278-279)

- "Jabir bin Abdullah (R) said that Rasul (Allah's Messenger) (S) cursed the acceptor of interest
  and its payer, and the one who records it, and the witness; and he said They are all equal.
  (Muslim)
- Abdullah Ibn Masud (R) has quoted a Hadith of Rasul (Allah's Messenger) (S) as saying: Whenever adultery and usury become rampant in a community, it is inevitable that wrath of Allah will befall upon them. (Abu Yala)
- Abu Huraira (R) has narrated that Rasul (Allah's Messenger) (S) said: Allah as his unique right
  will not allow four categories of people to enter the heaven and also refrain them from taking
  taste of his bounties 1) Drunkard 2) Usury 3) Devourers of orphan's wealth and 4) Disobedience
  of parents. (Mustadarake Hakim)
- Abu Huraira (R) has narrated that Rasul (Allah's Messenger) (S) said: you should protect yourself from 7(seven) destructive issues 'what are those'? -asked his companions. He said those are
   1) Join in worship others with Allah 2) Mesmerizing 3) Killing someone unlawfully 4) Usury 5)
   Devourers of orphan's wealth 6) Flight from the battle field and 7) To charge against chaste women. (Bukhari, Muslim and Abu Daud)
- Samura Ibn Zundub (R) has narrated that Rasul (Allah's Messenger) (S) said: I saw in a dream that two persons came to me and took me to a sacred place. Thereafter three of us proceeded to a river full to blood and saw that a man was swimming in the river and another was standing on the bank with huge rocks in front of him. When the swimmer approached the bank, the man standing on it hit the swimmer with the rocks so heavily that he receded to his original place. Whenever the swimmer tried to approach the bank of the river again, the standing person did the same as before. Rasul (Allah's Messenger) (S) asked 'who is this man in the river' One of the angels said 'He is a usurer'. (Bukhari)

# OPINION OF OTHER RELIGIONS AND GREAT MEN ON INTEREST

- Interest has been banned in the two books of Hazrat Musa (A.), which are considered as the scriptures of Jews. The 22nd line of Exodus goes as saying, 'If you lend money to a poor man, don't become money lenders and don't realize interest from him.'
- Similarly in 23rd line of ancient scripture of the Jews entitled "Deuteronomy" states, 'You don't lend money to your brother for interest -i.e interest on money, interest on foodstuff and interest on anything lent.'
- Hebrewism is known as Musaic or Jewism. Musaic laws or commands of Musa are the basis of
  Hebrewism. Interest was totally prohibited in Musaic law. This rule was exclusively practiced by
  the Jews. In this ideology, there are clear directions on interest as other aspects of economics.
  In Hinduism, usury business was restricted within the 'Baithayas'.
- One Jew couldn't take interest by lending money from another. But, taking interest was in practice by lending money to the people of other religions.
- Some writers quoted from the book, 'Talmud' that the Hebrew prophets forbade interest not only from Jews but from all. (Eric Roll, A history of Economic Thought: page 48)
- Interest was prohibited from the beginning of the Christianity to the advent of the Reform Movement and from the Church under pope in Rome to the division of other Churches, Christ said, 'Lend hopping for nothing again.' (Luke VI 35, Hanley: History of Economic Thought 1964, Page 101)

Economic impact can be defined as any increase or decrease in productive potential of an economy. By analyzing the economic impact we can understand how a bank adds value to the society. Economic impacts can be broadly categorized as:

- i) Direct Impact
- ii) Indirect Impact

#### **Direct Impact**

Direct impacts are the immediate economic effects resulting from the banks financial transactions. Bank's direct contribution to the economy resulted in the creation of employment opportunities, payment of tax to the government and maximization of shareholders wealth.

#### Indirect Impact

#### BismillahirRahmanir Rahim

At the very outset, we express our deep sense of gratitude to Almighty Allah (SWT), the Lord, and the Merciful for granting us a good result in overall business performance of the Bank during the challenging year 2017.

Respected Shareholders,

Assalamu Alaikum Wa Rahmatullahi Wa Barakatuh.

It is my great pleasure and opportunity to present the performance and future aspirations of your esteemed Bank. At the beginning I would like to convey my heartfelt gratitude to Bangladesh Bank for their time-befitting policies, guidance and supports. Now, I would like to express my sincere thanks to the valued stakeholders for their endless support in the Bank's continued success. #### **World Economy**

Global economic activity is picking up with a long-awaited cyclical recovery in investment, manufacturing, and trade, according to World Economic Outlook. World growth is expected to rise from 3.1 percent in 2016 to 3.5 percent in 2017 and 3.6 percent in 2018.

Stronger activity, expectations of more robust global demand, reduced deflationary pressures, and optimistic financial markets are all upside developments. But structural impediments to a stronger recovery and a balance of risks that remains tilted to the downside, especially over the medium term, remain important challenges.

With persistent structural problems such as low productivity growth and high income inequality pressures for inward-looking policies are increasing in advanced economies. These threaten global economic integration and the cooperative global economic order that has served the world economy, especially emerging market and developing economies, well. Against this backdrop, economic policies have an important role to play in staving off downside risks and securing the recovery, and a renewed multilateral effort is also needed to tackle common challenges in an integrated global economy.

#### **Bangladesh Economy**

Bangladesh Bureau of Statistics (BBS) has estimated the GDP growth at 7.24 per cent in FY17, which exceeds the official target of 7.20 per cent by 0.04 percentage point. Compared to many other developing countries, the 7.24 per cent GDP growth achieved by Bangladesh is quite impressive, but still the realized growth remains below the country's true potential.

Inadequate infrastructure, shortage of power and energy, weak investment climate, and lack of consistency in policy and regulatory framework are now major impediments to the country's development. These impediments must be removed to restore the confidence of the country's business and investor community.

Based on the IMF's World Economic Outlook, released in April 2017, the GDP of Bangladesh in PPP terms will cross US\$1,000 billion and the country will be ranked 30th largest economy of the world in 2022, which is 32nd in 2017. On nominal GDP basis, Bangladesh will be the 38th largest economy in 2022 as against 45th now.

In terms of US Dollar, the value of GDP in current market prices increased by 12.36 per cent to US\$248,767 million in FY17 from US\$221,396 million in the previous year.

Per capita GDP stood at US\$1,538 in FY17, compared to US\$1,385 in FY16, showing an increase of 11.05 per cent. The general point-to-point inflation came down to 5.44 per cent in FY17 from 5.92 per cent in FY16. Between end-June of 2016 and 2017, the Taka depreciated by 2.80 per cent in terms of US dollar. Gross foreign exchange reserves rose to US\$33.407 billion in the last working day of FY17 (29 June 2017).The amount was sufficient to cover the country's import bills for more than nine months.

#### **Economy Analyses**

#### **Global Economic Outlook**

Global economic activity is picking up with a long-awaited cyclical recovery in investment, manufacturing, and trade, according to World Economic Outlook. World growth is expected to rise from 3.1 percent in 2016 to 3.5 percent in 2017 and 3.6 percent in 2018.

Stronger activity, expectations of more robust global demand, reduced deflationary pressures, and optimistic financial markets are all upside developments. But structural impediments to a stronger recovery and a balance of risks that remains tilted to the downside, especially over the medium term, remain important challenges.

With persistent structural problems such as low productivity growth and high income inequality pressures for inward-looking policies are increasing in advanced economies. These threaten global economic integration and the cooperative global economic order that has served the world economy, especially emerging market and developing economies, well. Against this backdrop, economic policies have an important role to play in staving off downside risks and securing the recovery, and a renewed multilateral effort is also needed to tackle common challenges in an integrated global economy.

#### **Bangladesh Economic Outlook**

Bangladesh Bureau of Statistics (BBS) has estimated the GDP

growth at 7.24 per cent in FY17, which exceeds the official target of 7.20 per cent by 0.04 percentage point. Compared to many other developing countries, the 7.24 per cent GDP growth achieved by Bangladesh is quite impressive, but still the realized growth remains below the country's true potential.

Inadequate infrastructure, shortage of power and energy, weak investment climate, and lack of consistency in policy and regulatory framework are now major impediments to the country's development. These impediments must be removed to restore the confidence of the country's business and investor community.

Based on the IMF's World Economic Outlook, released in April 2017, the GDP of Bangladesh in PPP terms will cross US\$1,000 billion and the country will be ranked 30th largest economy of the world in 2022, which is 32nd in 2017. On nominal GDP basis, Bangladesh will be the 38th largest economy in 2022 as against 45th now.

In terms of US Dollar, the value of GDP in current market prices increased by 12.36 per cent to US\$248,767 million in FY17 from US\$221,396 million in the previous year.

Per capita GDP stood at US\$1,538 in FY17, compared to US\$1,385 in FY16, showing an increase of 11.05 per cent. The general point-to-point inflation came down to 5.44 per cent in FY17 from 5.92 per cent in FY16. Between end-June of 2016 and 2017, the Taka depreciated by 2.80 per cent in terms of US dollar. Gross foreign exchange reserves rose to US\$33.407 billion in the last working day of FY17 (29 June 2017). The amount was sufficient to cover the country's import bills for more than nine months.

#### **Banking sector analysis**

After the independence, banking industry in Bangladesh started its journey with 6 nationalized commercialized banks, 2 State owned specialized banks and 3 Foreign Banks. A properly designed and effectively enforced system of internal controls is a vital component of bank management and a foundation for the safe and sound operation of the organization as it helps protecting organization's assets and profitability, ensures efficient operation & effective risk management, produces reliable financial reports, ensures compliance with laws and regulations, and finally, safeguards interest of the stakeholders.

Internal control is a process, rather than a structure. It is not a separate activity disconnected from the rest of business activities, rather is an integral part of those activities. The responsibility of implementing internal controls starts with the business lines, which are the "first lines of defense" against breaches that could cause the bank not to fulfill its objectives, not to report properly, or not to comply with laws and regulations. Beyond that, in any bank, the three important "control functions" are risk management, compliance, and internal audit. This triumvirate of key

functions is underpinned by, and in turn implements and reinforces, the system of internal controls. The first two of these control functions constitute the "second lines of defense" against mishaps. The final, or "third line of defense" is the internal audit function.

Internal Control System is such a system which is not distinct from other banking functionalities rather it is an indispensable part of each and every functions of banking. Actually each and every one from Board of Directors to the lowest level employee is affiliated with the Internal Control System of the Bank. The components of Internal Control Environment are Board of Directors, Board Audit Committee, Management, Organizational Structure, Independent audit mechanism, Shariah Supervisory Committee, Concurrent Audit, Whistle Blowing System, Zonal Office, Information and Communication Technology (ICT), Management Information System (MIS), Policy/Manuals/Guidelines/Circulars, Risk Management System, External Auditors Board of Directors, Board Audit Committee, Management, Organizational Independent audit mechanism, Supervisory Committee, Concurrent Audit, Whistle Blowing System, Zonal Office, Information and Communication Technology (ICT), Management Information System (MIS), Policy/Manuals/ Guidelines/ Circulars, Risk Management System, External Auditors etc. If all the components works accordingly, then ICC Environment develops which contributes positively for the establishment of Good Corporate Governance. Internal Control & Compliance Wing is working directly or indirectly with an aim for establishment of Sound Corporate Governance.

#### **Risk Management**

Risk is generally defined by the adverse impact on the profitability of several distinct sources of uncertainty. Risk-taking is an inherent element in the banking business, and, indeed profits are in part for successful risk taking in business. Greater risk and poorly managed risk increase the danger that the bank may incur huge losses and be forced out of business. A bank must run its operations with two goals- to generate profits and to stay in business. Thus, banks are maintaining a trade-off between risk and return and that is the business of Risk Management. Risk Management's main objectives are to identify and measuring the risks and advise mitigation there against. Banking operations are mainly exposed to:

- Investment or default Risk (including concentration risk, country risk, and settlement risk)
- Market risk (Including interest rate risk in the banking book, Forex risk, and equity price risk)
- Liquidity risk
- Operational risk
- Other risks (compliance risk, strategic risk, reputation risk, money laundering risk etc.)

AIBL has three lines of defense for identification, assessment, control and mitigation of risks.

1st line of defense: Day to Day Operational Management and Internal Controls

- Branches
- Support Functions

2nd line of defense: Risk Management and Compliance Functions

- Zonal Office
- Different Risk Management Committees
- Risk Management Division and CRO
- Board Risk Management Committee

3rd line of defense: Independent Assurance

- Internal Audit
- Board Audit Committee
- Supervision of Regulators

In accordance with the direction of Bangladesh Bank, AIBL has established 'Risk Management Division' and possesses board's approved risk management guidelines designed to ensure that risks are identified, monitored and reported. Risk Management Division exclusively manages 6 (six) core risks in line with the core risk Management guidelines by the Central Bank. AIBLformed All Risk Committee in Management level in addition tosix separate Core Risk Management Committees to address basic risk management activities like identification, assessment, measurement and mitigation of risks. Besides, Board Risk Management Committee oversights the overall risk management activities of the bank and performs their duties with utmost care to minimize the risk level. Regular meeting of all the committees are held on monthly/quarterly basis.

yearly Comprehensive Risk Management Report (CRMR) incorporating all risk areas are prepared as per directions of the prescribed format of Bangladesh Bank. These Reports are discussed in depth in the All Risk Committee in the Management level as well as Board Risk Management Committee and necessary instructions and guidance are given and implemented there against.

### 3.D New accounting standards not yet adopted:

The Bank has consistently applied the accounting policies as set out in Note 2 to all periods presented in these financial statements. The various amendments to standards, including any consequential amendments to other standards, with the date of initial application of 1 January 2017 have been considered. However, these amendments have no material impact on the financial statements of the Bank.

In December 2017, ICAB has decided to adopt IFRS replacing BFRS effective for annual periods beginning on or after 1 January 2018. However, since currently issued BFRS have been adopted from IFRS without any major modification, such changes would not have any material impact on financial statements.

A number of standards and amendments to standards are effective for annual periods beginning after 1 January 2017 and earlier application is permitted. However, the Bank has not early applied the following new standards in preparing these financial statements.

"(a) BFRS 9 Financial Instruments (to be adopted as IFRS 9) BFRS 9, published in July 2014, replaces the existing guidance in BAS 39 Financial Instruments: Recognition and Measurement. BFRS 9 includes revised guidance on the classification and measurement of the financial instruments, a new expected credit loss model for calculating impairment of financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from BAS 39. BFRS 9 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted. As per the Bank's assessment, any material impact of BFRS 9 would be primarily on calculation of impairment provision. However, as Bangladesh Bank has not issued any circular to revise its current impairment, classification and measurement policies to align with BFRS 9 the Bank is unable to quantify any potential impact on its financial statements."

"(b) BFRS 15 Revenue from Contracts with Customers (to be adopted as IFRS 15) BFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaces existing recognition guidance, including BAS 18 Revenue, BAS 11 Construction Contracts and BFRI 13 Customer Loyalty Programmes. BFRS 15 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted. Based on preliminary assessment the Bank has determined that BFRS 15 has no material impact on its financial statements."

"(c) IFRS 16 Leases" IFRS 16, issued in January 2016 replaces existing leases guidance and effective for reporting period beginning on or after 1 January 2019. It will result in almost all leases being recognised on the balance sheet, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. The only exceptions are short-term and low-value leases. The accounting for lessors will not significantly change. The Bank has not yet assessed any potential impact of IFRS 16 on its financial statements.

"(d) IFRS 17 Insurance Contracts" IFRS 17 was issued in May 2017 and applies to annual reporting periods beginning on or after 1 January 2021. IFRS 17 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The objective of IFRS 17 is to ensure that an entity provides relevant information that faithfully represents those contracts. The Bank has not yet assessed in potential impact of IFRS 17 on its financial statements.

There are no other standards that are not yet effective and that would be expected to have a material impact on the Bank in the current or future reporting periods and on foreseeable future transactions.

Bangladesh Bank has specified the standard of disclosure through Guidelines on Risk Based Capital Adequacy (December 2010) which revised in Basel III Guideline on December 2014 with effect from January 2015. Interest rate risk is the exposure of a bank's financial condition due to adverse movements in interest rates. Changes in interest rates affect a bank's earnings by changing its net interest income and the level of other interest sensitive income and operating income. Changes in interest rates also affect the underlying value of the bank's assets, liabilities and off-balance-sheet instruments because the economic value of future cash flows changes when interest rates change.

The ALCO of the Bank formulates and reviews strategies and provides guidance for management of liquidity risk within the framework laid out in the ALM Policy.
ii) Methods used to measure Liquidity risk	1) Liquidity risk is measured and monitored through two approaches-1) Time Bucket Analysis:  Time Bucket Analysis involves comprehensive tracking of cash flow mismatches and is done through preparation of Structural liquidity statement on a regular basis. Appropriate tolerance levels/prudential limits have been stipulated for mismatches in different time buckets.  2) Ratio Analysis:  Under Ratio Analysis various balance sheet ratios are prescribed with appropriate limits. The compliance of ratios to the prescribed limits ensures that the Bank has managed its liquidity through appropriate diversification and kept it within the sustainable limit. The Bank also assess its short-term liquidity mismatches and reports the same in the short term dynamic liquidity report which represents the cash flow plans of various asset and liability generating units and seasonal variation

### 10. Leverage Ratio:

### a) Qualitative Disclosures:

i) Views of BOD on system to reduce excessive leverage	Excessive leverage by banks is widely believed to have contributed to the global financial crisis. Thus Basel III rules have introduced leverage ratio as a non-risk-based backstop measure, to supplement risk-based capital requirements. Board of Directors of our Bank continuously is monitoring the exposure limit of lending, capital strength of our Bank in order to avoid building-up excessive on- and off-balance sheet leverage.
ii) Policies and processes for managing excessive on and off balance sheet leverage	Many regulators are considering raising the leverage ratio. This means that banks will have to keep more capital reserves. To increase capital reserves in order to meet higher leverage ratios requires selling assets to get cash or reducing lending. Higher leverage ratio can decrease the profitability of banks because it means banks can do less - profitable lending. However, increasing the leverage ratio means that banks have more capital reserves and can more easily survive a financial crisis. In view of the impact of leverage into the business, our bank management takes decision about future investment. Considering the financial strength, Bank also make Capital planning and business budget to go on a right way.
iii) Approach for calculating exposure	The leverage ratio is a volume-based measure and is calculated as Basel III Tier I capital divided by total on and off-balance sheet exposures.  A minimum Tier 1 leverage ratio of 3% is being prescribed both at solo and consolidated level.  Tier-1 Capital (after related deductions)  Leverage Ratio =

- আল্লাহ্ সুদকে ধ্বংস করে দেন এবং সাদাকাকে বর্ধিত করেন। আর আল্লাহ্ কোনো অবিশ্বাসী পাপীদের ভালবাসেন না। (সূরা আল-বাকারা - আয়াত ২৭৬)
- সাহাবী হযরত জাবির বিন আব্দুল্লাহ (রাঃ) বর্ণনা করেছেন, "রাসূলুল্লাহ (সাঃ) সুদ গ্রহীতা, সুদ দাতা, সুদের
  চুক্তিপত্র সম্পাদনকারী, সাক্ষী- সকলের উপর অভিশাপ (লানত) দিয়েছেন এবং বলেছেন তারা সকলে
  সমান অপরাধী।" (মুসলিম)।
